

My Nature Flip Book

mushrooms

Facts:

- Mushrooms break down other plants and animals
- Mushrooms are NOT plants, they are a fungus

Observations:

acorns

Facts:

- Acorns are the seeds of oak trees
- Squirrels love to collect and hide acorns for food

Observations:

butterflies

Facts:

- Butterflies start as caterpillars before turning into butterflies.
- Their wings have tiny scales that make beautiful patterns/colors.

Observations:

ladybugs

Facts:

- Ladybugs have bright colors to warn other animals not to eat them
- They help gardens by eating tiny bugs that harm plants.

Observations:

dandelions

Facts:

- Dandelions start as yellow flowers and turn into white, fluffy seed balls.
- Bees love dandelion flowers because they have sweet nectar.

Observations:
