Letter M Dot Tracing

With a dot marker or dot stickers, dot the circles to trace the letter M, both uppercase and lowercase.

m is for moon

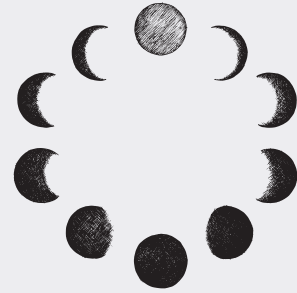

Name: _____

Date: _____

Moon Lesson

What is the moon?

The moon is a big, round rock in the sky that we can see at night. It goes around the Earth and changes shapes like a circle, a half-circle, or a tiny sliver!

What is the moon made of?

The moon is made of rock and dust. It doesn't have trees, water, or people. It's kind of like a giant dusty ball in the sky.

Rock

Dust

What does the moon do?

The moon goes around the Earth and shines at night. It helps light up the sky when the sun goes down. The moon helps us understand what part of the month we are in by changing how much of it we can see at night.

Can we go to the moon?

Yes! Astronauts fly to the moon wearing special suits and ride in a big rocket ship that blasts off into the sky. The rocket flies all the way to the moon, and when it lands, the astronauts can walk on the moon with their space boots!

Moon Rock Scavenger Hunt

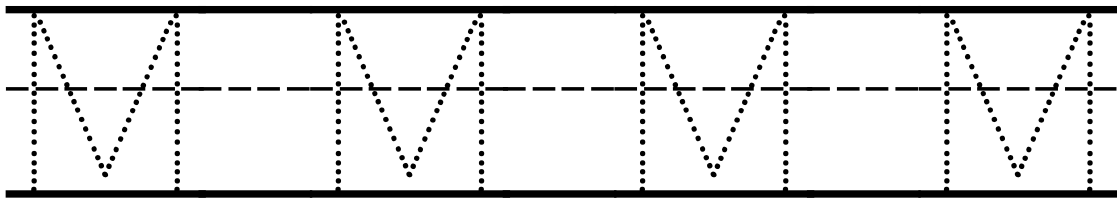

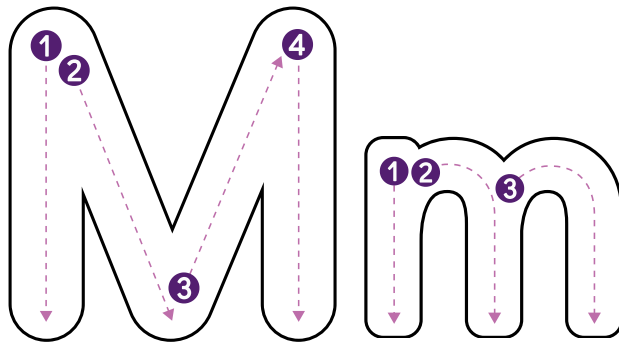

For this activity you will need 6 rocks, either from what you have, what you can find, or from the store. Study these rocks and draw a picture of each of them in the boxes below. Then ask your adult to hide these rocks around the house. After they are hidden, go on a moon rock scavenger hunt to find your moon rocks and check them off your scavenger hunt list.

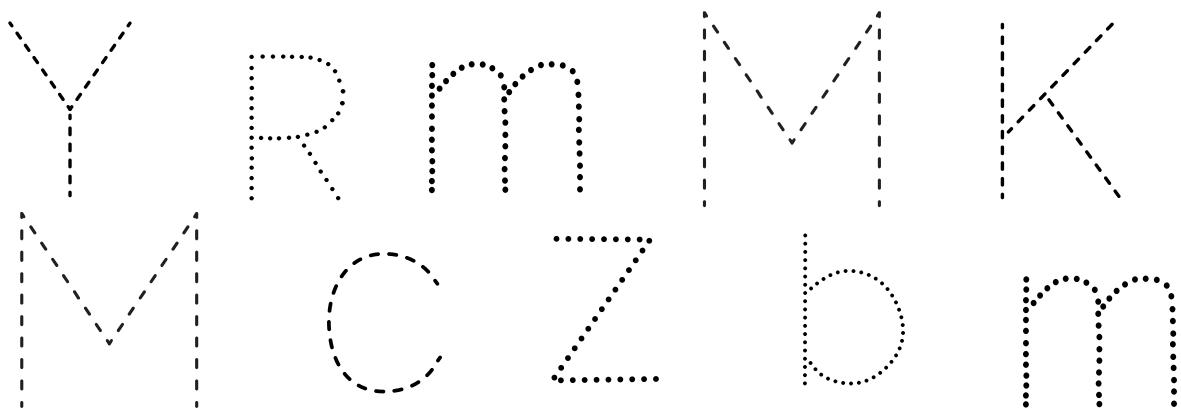

Name: _____ Date: _____

Tracing Letter M

Trace the dotted letters to practice writing the letter M in uppercase and lowercase.

Trace the dotted letter M's and m's below.

October Activities

Moon Painting with Sponges

Cut out the moon outline on the next page. Tape it down loosely onto a white piece of paper. Cut a few sponges into circle or star shapes. Then dip your sponges into any paint color(s) that you wish. Sponge paint all over your piece of paper, covering the moon cutout as well. After your paper is covered with colorful paint and the paint has dried, carefully remove the moon cutout to reveal your beautiful moon painting.

Phases of the Moon Oreo Activity

For this activity you will need 8 Oreos and a spoon or butter knife. Take each of the Oreos apart, making sure to leave most of the cream on one half of the cookie. Take a look at the 8 moon phases below. Shape the cream on the cookies to match each of the moon phases. After they are completed, take time to discuss each of the phases, when they occur, what they look like, and what happens to cause those shapes.
